MULTIFUNCTIONAL SETTINGS

This device has 6 separate menus: MAIN, PICTURE 1, PICTURE 2, INPUT, SCREEN, OPTION. Each of these menus is operated using the same methods. The basic operations of these menus are as follows.

Menu screen display : Press the "MENU" button.

Menu selection : Choose a menu name using the \blacktriangle / \blacktriangledown button, and press the \blacktriangleright button or the ENTER button.

Item selection : Choose an item using the \blacktriangle / \blacktriangledown button, and press the \blacktriangleright button or the ENTER button.

Return menu to last previous screen: Press the \blacktriangleleft button or the ESC button.

Execution of settings and/or adjustments: Operate by using the \blacktriangle / \blacktriangledown button. (For further details, read the explanation for each separate menu.)

Initialization of settings and/or adjustments: During operation, press the RESET button. (Note that items whose functions are performed simultaneously with the operation of clock phase, language selection, automatic adjustment, etc., cannot be initialized.)

End menu operations: Press the MENU button, or do not perform any operation for several seconds.

MAIN Menu

With the MAIN menu, the seven items shown in the Table below can be performed.

Perform each operation in accordance with the instructions in the Table.

Example : MAIN Menu (BRIGHT)

MAIN Menu

| Item | Description |
|--------------------|---|
| BRIGHT | Adjust Brightness: Light \blacktriangle \leftrightarrow \blacktriangledown Dark |
| CONTRAST | Adjust Contrast: Strong \blacktriangle \leftrightarrow \blacktriangledown Weak |
| ASPECT | Select Aspect Ratio: At RGB Input: 4:3 \blacktriangledown \leftrightarrow \blacktriangle 16:9 At VIDEO Input, S-VIDEO Input: 4:3 \blacktriangledown \leftrightarrow \blacktriangle 16:9 \blacktriangledown \leftrightarrow \blacktriangle SMALL • The SMALL picture may not be displayed correctly with certain input signals. |
| PICT.POSIT. | Select Picture Position (for 16:9/SMALL Picture): TOP \blacktriangleright \leftrightarrow \blacktriangleleft CENTER \blacktriangledown \leftrightarrow \blacktriangle BOTTOM |
| GAMMA | Select Gamma Mode: NORMAL \blacktriangledown \leftrightarrow \blacktriangle CINEMA \blacktriangledown \leftrightarrow \blacktriangle DYNAMIC |
| MIRROR | Select Mirror Status: NORMAL \blacktriangledown \leftrightarrow \blacktriangle H:INVERT \blacktriangledown \leftrightarrow \blacktriangle V:INVERT \blacktriangledown \leftrightarrow \blacktriangle H&V:INVERT |
| LANGUAGE | Select Menu Language: ENGLISH \blacktriangledown \leftrightarrow \blacktriangle FRANÇAIS \blacktriangledown \leftrightarrow \blacktriangle DEUTSCH \blacktriangledown \leftrightarrow \blacktriangle ESPAÑOL \blacktriangledown \leftrightarrow \blacktriangle ITALIANO \blacktriangledown \leftrightarrow \blacktriangle NORSK \blacktriangledown \leftrightarrow \blacktriangle NEDERLANDS \blacktriangledown \leftrightarrow \blacktriangle 日本語 \blacktriangle \leftrightarrow \blacktriangledown POTUGUÉS \blacktriangledown \leftrightarrow \blacktriangle 中文 \blacktriangledown \leftrightarrow \blacktriangle 한글 |

PICTURE 1 Menu

With the PICTURE 1 menu, the five items shown in the Table below can be performed.
Perform each operation in accordance with the instructions in the Table.

Example : PICTURE1 Menu
(COLOR BAL R)

ENGLISH

PICTURE1 Menu

| Item | Description |
|--------------------|---|
| COLOR BAL R | Adjust Red Color Balance: Dark ⇌ Light |
| COLOR BAL B | Adjust Blue Color Balance: Dark ⇌ Light |
| SHARPNESS | Adjust Sharpness (for VIDEO/S-VIDEO): Clear ⇌ Soft |
| COLOR | Adjust COLOR (for VIDEO/S-VIDEO): Dark ⇌ Light |
| TINT | Adjust Tint (for VIDEO/S-VIDEO): Green ⇌ Red |

PICTURE 2 Menu

With the PICTURE 2 menu, the five items shown in the Table below can be performed.
Perform each operation in accordance with the instructions in the Table.

Example : PICTURE2 Menu
(V POSITION)

PICTURE2 Menu

| Item | Description |
|-------------------|--|
| V POSITION | Adjust Vertical Position (for RGB): Up ⇌ Down |
| H POSITION | Adjust Horizontal Position (for RGB): Left ⇌ Right |
| H PHASE | Adjust Horizontal Phase (for RGB): Right ⇌ Left • Adjust to eliminate flicker. |
| H SIZE | Adjust Horizontal Size (for RGB): Large ⇌ Small • If the horizontal size adjustment is excessive, the image may not be displayed correctly. In such a case, initialize H SIZE with the RESET button. |
| OVER SCAN | Select Over-scan Ratio (for VIDEO/S-VIDEO): LARGE ⇌ MIDDLE ⇌ SMALL • It is recommended to select SMALL to avoid flicker at the lower part of the picture. |

MULTIFUNCTIONAL SETTINGS (continued)

INPUT Menu

With the INPUT menu, the four items shown in the Table below can be performed. With inputting of RGB IN 1 and RGB IN 2 signals, the horizontal and vertical frequencies of the signals will be displayed on the initial screen of the INPUT menu.

Perform each operation in accordance with the instructions in the Table.

Example : INPUT Menu (AUTO)

INPUT Menu

| Item | Description |
|------------------|---|
| AUTO | <p>Auto Adjust (for RGB): Automatically adjusts H POSITION, V POSITION, H PHASE, and H SIZE. Use this function with the maximum window size.</p> <p>Auto Adjust (for VIDEO/S-VIDEO): Automatically selects the proper VIDEO mode for the current input signal. This function is active only when the AUTO mode is selected for the item VIDEO. Refer to the description for the item VIDEO below.</p> <ul style="list-style-type: none"> This function may not be available with a PAL60 signal and certain other signals. The AUTO mode operation requires approximately 10 seconds. |
| VIDEO | <p>Select Mode of Signal Type (for VIDEO/S-VIDEO): AUTO (▼) ⇔ (▲) NTSC (▼) ⇔ (▲) PAL (▼) ⇔ (▲) SECAM (▼) ⇔ (▲) NTSC4.43 (▼) ⇔ (▲) M-PAL (▼) ⇔ (▲) N-PAL</p> <p>Selecting AUTO mode activates and performs the AUTO function for VIDEO/S-VIDEO. It automatically selects the proper mode from among those above. Use this function if the image becomes unstable with VIDEO/S-VIDEO. (e.g. The image becomes irregular, or lacks color.)</p> <ul style="list-style-type: none"> AUTO mode may not function correctly with a PAL60 signal and certain other signals. The AUTO mode operation requires approximately 10 seconds. |
| SYNC ON G | <p>On/Off SYNC ON G Mode: TURN ON (▼) ⇔ (▲) TURN OFF</p> <p>Selecting TURN ON turns on the SYNC ON G mode. The SYNC ON G mode allows reception of SYNC on G.</p> <ul style="list-style-type: none"> In the SYNC ON G mode, the picture may be distorted with certain input signals. In such a case, remove the signal connector so that no signal is received and turn SYNC ON G off, and then reconnect the signal. |

SCREEN Menu

With the SCREEN menu, the five items shown in the Table below can be performed. Please perform each operation in accordance with the instructions in the Table.

Example : SCREEN Menu (BLANK)

ENGLISH

SCREEN Menu

| Item | Description |
|----------------------|--|
| BLANK | <p>Selection of BLANK Screen: MyScreen (▼) ⇄ (▲) ORIGINAL (▼) ⇄ (▲) [] (▼) ⇄ (▲) [] (▼) ⇄ (▲) []</p> <p>The BLANK Screen may be voluntarily selected. The BLANK Screen is displayed when the screen has been erased (i.e., made to vanish) by manipulating the BLANK button (please refer to the "Temporarily Blanking the Screen" section of the separate booklet, Vol. 1 (Basic)).</p> <p>MyScreen: Using the MyScreen category (see this Table, below), one can register a desired screen (or screens). At the time of factory shipment, this is set as a non-patterned (plain) blue color screen.</p> <p>ORIGINAL: Existing standard screens. Please make confirmation using the actual screen(s).</p> <p>Option screens: Various colored non-patterned (plain) screens displayed within the Menus.</p> <ul style="list-style-type: none"> The MyScreen and the ORIGINAL Screen will each change to a non-patterned (plain) black color screen several minutes after being displayed. |
| START UP | <p>Selection of START UP Screen: MyScreen (▼) ⇄ (▲) ORIGINAL (▼) ⇄ (▲) TURN OFF</p> <p>The START UP Screen may be voluntarily selected. The START UP Screen is displayed when no signal has been inputted, or when spec signals are being inputted.</p> <p>MyScreen: Using the MyScreen category (see this Table, below), one can register a desired screen (or screens). At the time of factory shipment, this is set as a non-patterned (plain) blue color screen.</p> <p>ORIGINAL: Existing standard screens. Please make confirmation using the actual screen(s).</p> <p>TURN OFF: A non-patterned (plain) blue color screen.</p> <ul style="list-style-type: none"> The MyScreen and ORIGINAL screens will switch to the BLANK screen (see above in this table) a few minutes after being displayed. If the BLANK screen is the MyScreen or ORIGINAL screen, it will turn immediately to a solid black screen. |
| MyScreen | <p>Registration of MyScreen: When this item is executed, the MyScreen Menu for registration of MyScreen for the BLANK Screen and the START UP Screen is displayed. When operations are performed in accordance with this Menu, one can "cut" and register desired screens from among the received images within the display.</p> <ol style="list-style-type: none"> After the "Do you start capturing this picture?" message has been displayed, pressing the ESC (or RESET) button interrupts execution of the MyScreen. When the ENTER button is pressed, the picture becomes static (no longer moves), and a frame for picture cutting, as well as the message that follows below, appear. Please press the button when the screen you want to register is currently being displayed. When the "Move the capture area as you want." message has been displayed, pressing the ESC (or RESET) button will eliminate the static state of the picture, and operations can be performed again from operation 1. The frame can be moved using the (◀), (▶), (▲), (▼) buttons. After designating the screen you want to register, pressing the ENTER button will initiate screen registration. The registration process takes approximately 1 minute to complete. When the registration has been completed, the screen of the registered MyScreen, plus the message, "MyScreen registration is finished," will be displayed for several seconds, after which the operation is terminated. |
| MyScreen Size | <p>Selection of MyScreen display size: x1 (▼) ⇄ (▲) FULL</p> |
| MyScreen Lock | <p>Invalidation of MyScreen registration function: TURN ON (▼) ⇄ (▲) TURN OFF</p> <p>When TURN ON is selected, the MyScreen category (see this Table, above) cannot be executed: in this way, one can prohibit rewrites ("writeovers") of the MyScreen.</p> |

MULTIFUNCTIONAL SETTINGS (continued)

OPTION Menu

With the OPTION menu, the five items shown in the Table below can be performed.

Please perform each operation in accordance with the instructions in the Table.

Example : OPTION Menu (VOLUME)

OPTION Menu

| Item | Description |
|--------------------|---|
| VOLUME | Adjust Volume: High (▲) ⇄ (▼) Low |
| AUTO OFF | Adjust AUTO OFF Time: Long (MAX. 99 min.) (▼) ⇄ (▲) Short (Min. 1 min.) (▼) ⇄ (▲) (DISABLE: 0 min.) The system automatically enters the standby mode if no signal is received within the set time. This function is inactive when DISABLE (0 min.) is selected. |
| WHISPER | Select WHISPER Mode: NORMAL (▼) ⇄ (▲) WHISPER When WHISPER is selected the WHISPER mode is activated. In the WHISPER mode, acoustic noise and screen brightness are reduced. |
| LAMP TIME | Refer to LAMP TIME: When set, this function displays the total time the projector lamp has been used since new. Reset LAMP TIME [Use this function only when the lamp has been replaced!]: Depress the RESET button for at least 3 seconds while lamp time is being displayed. The reset menu will then appear. After you replace the lamp with a new lamp, select RESET on the menu with the (▲) button. <ul style="list-style-type: none"> Do not reset the lamp time unless you have replaced the lamp. And, always reset the lamp time when replacing the lamp. The message functions will not operate properly if the lamp time is not reset correctly. Before replacing the lamp, carefully read the descriptions headed "THE LAMP". |
| FILTER TIME | Refer to FILTER TIME: This function displays the total time the air-filter has been used since new. Reset FILTER TIME [Use this function only when the filter is cleaned or replaced!]: Depress the RESET button for at least 3 seconds while filter time is being displayed. The reset menu will then appear. After you replace the filter, select RESET on the menu with the (▲) button. <ul style="list-style-type: none"> Do not reset the filter time unless you have cleaned or replaced the filter. And, always reset the filter time when cleaning or replacing the filter. The message functions will not operate properly if the filter time is not reset correctly. Before cleaning or replacing the filter, carefully read the descriptions headed "THE AIR FILTER". |

WHAT TO DO WHEN YOU THINK A MACHINE DEFECT HAS OCCURRED

Related Messages

When the unit's power is ON, messages such as those shown below may be displayed. When any such message is displayed on the screen, please respond as described below.

| Message | Description |
|--|---|
| CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIMER. (Note 1) | Lamp usage time is approaching 2,000 hours. (Note 2) Preparation of a new lamp, and an early lamp change, is recommended. After you have changed the lamp, please be sure to reset the lamp timer. |
| CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIMER. THE POWER WILL TURN OFF AFTER * * hr. (Note 1) | Lamp usage time is approaching 2,000 hours. A lamp change within * * hours is recommended. (Note 2) When lamp usage reaches 2,000 hours, the power will automatically be turned OFF. Please change the lamp by referring to "THE LAMP" in Vol.1 (Basic). After you have changed the lamp, please be sure to reset the lamp timer. |
| CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIMER. THE POWER WILL TURN OFF AFTER 0 hr. | As lamp use has reached 2,000 hours, the power will soon be automatically turned OFF. (Note 2) Please immediately turn the power OFF, and follow the instructions in the "THE LAMP" section of the separate booklet, Vol.1 (Basic). After you have changed the lamp, please be sure to reset the lamp timer. |
| CLEAN THE AIR FILTER AFTER CLEANING AIR FILTER, RESET THE FILTER TIMER. | A note of precaution when cleaning the air filter. After cleaning the filter, operate FILTER TIME of the OPTION Menu, and perform reset of the filter timer. |
| NO INPUT IS DETECTED ON * * * | There is no input signal. Please confirm the signal input connection, and the status of the signal source. |
| SYNC IS OUT OF RANGE ON *** <input type="text" value="fH"/> *****kHz <input type="text" value="fV"/> *****Hz | The horizontal or vertical wavelength of the inputted signal is outside of the response parameters of this unit. Please confirm the specs for this unit or the signal source specs. |
| CHECK THE AIR FLOW | The internal portion temperature is rising. Please turn the power OFF, and allow the unit to cool down for approximately 20 minutes. After having confirmed the following items, then please resent the power to ON. <ul style="list-style-type: none"> • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? |

NOTES

Note 1: Although this message will be automatically disappeared after around 3 minutes, it will be reappeared every time the power is turned ON.

Note 2: Lamps have a finite product life. Lamps are characterized by the fact that, after long hours of usage, a lamp will no longer light up, or the lamp will break or burst, etc. This unit is equipped with an automatic shut-down function, such that the power will automatically be turned OFF when lamp usage time has reached 2,000 hours. Please be aware, however, that among lamp types, there are major differences in product lifetimes; a lamp may thus fail to light even prior to the functioning of the automatic shut-down function of this unit.

Regarding the Indicator Lamps

Lighting and flashing of the POWER indicator, the LAMP indicator, and the TEMP indicator have the meanings as described in the Table below. Please respond in accordance with the instructions within the Table.

| POWER indicator | LAMP indicator | TEMP indicator | Description |
|------------------------------------|---|--------------------------|--|
| The orange lamp is lighted | Turned OFF (Not lighted) | Turned OFF (Not lighted) | The STANDBY mode is set |
| Flashing of the green lamp | Turned OFF | Turned OFF | The unit is warming up. Please wait. |
| The green lamp is lighted | Turned OFF | Turned OFF | The unit is in an ON state. Ordinary operations may be performed. |
| Flashing of the orange lamp | Turned OFF | Turned OFF | The unit is cooling down. Please wait. |
| Blinking of the red lamp | - | - | The unit is cooling down. Please wait. A certain error has been detected. Wait until the POWER indicator lamp has finished flashing, and then perform the proper response measure using the item descriptions below as reference. |
| The red lamp is lighted, or blinks | The red lamp is lighted | Turned OFF | The lamp does not light. There is a possibility that the interior portion has become heated. Turn the power OFF and wait approximately 20 minutes. After the main unit has cooled down, please confirm whether or not there is blockage of the air passage aperture, whether or not the filter is dirty, and/or whether or not the peripheral temperature exceeds 35°C, etc. After performing any needed maintenance, turn the power ON again; if the same display is displayed, then please change the lamp. |
| The red lamp is lighted, or blinks | Blinking of the red lamp | Turned OFF | Either there is no lamp and/or lamp cover, or either of these has not been properly fixed (attached). Turn the power OFF and wait approximately 45 minutes. After the main unit has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover. After performing any needed maintenance, turn the power ON again; if the same display is displayed, then please contact a sales store or a service company. |
| The red lamp is lighted, or blinks | Turned OFF | Blinking of the red lamp | The cooling fan is not operating. Turn the power OFF and wait approximately 20 minutes. After the main unit has cooled down, please make confirmation that no foreign matter has become caught in the fan, etc. After performing any needed maintenance, turn the power ON again; if the same display is displayed, then please contact a sales store or a service company. |
| The red lamp is lighted, or blinks | Turned OFF | The red lamp is lighted | There is a possibility that the interior portion has become heated. Turn the power OFF and wait approximately 20 minutes. After the main unit has cooled down, please confirm whether or not there is blockage of the air passage aperture, whether or not the filter is dirty, and/or whether or not the peripheral temperature exceeds 35°C, etc. After performing any needed maintenance, turn the power ON again; if the same display is displayed, then please contact a sales store or a service company. |
| The green lamp is lighted | Alternative blinking with the red lamp | | There is a possibility that the interior portion has become overcooled. Please use the unit within the usage temperature parameters (0°C to 35°C). After performing any needed maintenance, turn the power ON again; if the same display is displayed, then please contact a sales store or a service company. |
| The green lamp is lighted | Simultaneous blinking with the red lamp | | This is a notification that it is time to clean the filter. After cleaning the filter, operate the FILTER TIME portion of the OPTION Menu, and perform reset of the FILTER TIME. |

NOTE

When the interior portion has become overheated, for safety purposes, the power source is automatically turned OFF, and the indicator lamps may also be turned OFF. Press the "○" (power OFF) side of the main power switch, and wait for approximately 20 minutes. Please then use the unit only after having first confirmed that the unit has sufficiently cooled down.

WHAT TO DO WHEN YOU THINK A MACHINE DEFECT HAS OCCURRED (continued)

ENGLISH

Phenomena That May Easily Be Mistaken for Machine Defects

Before requesting repair, check in accordance with the following chart.
If the situation cannot be corrected, then contact your dealer.

| Phenomenon | Cases not involving a machine defect | Items to be confirmed | Reference Page(s) |
|--|---|---|---------------------|
| Power does not come ON | The main power source is not ON. | Turn on the main power. | Vol.1-3, 14 |
| | The electrical power cord is not plugged in. | Correctly connect the power cord. | |
| | The main power source has been interrupted during operation, such as by a power outage (blackout), etc. | Be sure to press the "O" (power OFF) side of the main power switch, and leave this OFF for approximately 20 minutes. After the unit has sufficiently cooled down, turn ON the power source. | Vol.1-14 |
| No sound or pictures are outputted | The input changeover settings are mismatched. | Select the input signal, and correct the settings. | Vol.1-15 |
| | No signal is being inputted. | Correctly connect the connection cord. | Vol.1-10, 11 |
| Pictures are displayed, but no sounds are heard | The electrical wiring to this unit is not correctly connected. | Correctly connect the connection cord. | Vol.1-10, 11 |
| | The volume setting has been set at (or adjusted to) an extremely low level. | Adjust the VOLUME setting to a higher level. | Vol.1-17 |
| | The MUTE mode is the current setting. | Press the MUTE button to release (change) the MUTE mode setting. | Vol.1-17 |
| Sounds are heard, but no pictures are displayed | The electrical wiring to this unit is not correctly connected. | Correctly connect the connection cord. | Vol.1-10, 11 |
| | The brightness setting has been set at (or adjusted to) an extremely low level. | Adjust the BRIGHT setting to a brighter level. | Vol.2-2 |
| | The lens cap has not been removed. | Remove the lens cap. | Vol.1-14 |
| Colors have a faded-out appearance Color tone is poor | Color depth setting or color tone setting | Perform picture adjustments by changing the COLOR BAL R, the COLOR BAL B, and/or the TINT settings, etc. | Vol.2-3 |
| Pictures appear dark | The brightness setting and/or contrast setting has not been properly adjusted. | Perform picture adjustments by changing the BRIGHT and/or CONTRAST settings, etc. | Vol.2-2 |
| | The WHISPER mode is the current setting. | Change (by releasing) from the WHISPER mode. | Vol.2-6 |
| | Lamp is approaching the end of its product lifetime. | Exchange the old lamp with a new lamp. | Vol.1-25, 26 |
| Pictures appear blurry | Either the FOCUS setting or the H PHASE is not properly adjusted. | Adjust the FOCUS and H PHASE settings. | Vol.1-15 Vol.2-3 |

NOTE

Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and such do not constitute or imply a machine defect.

SPECIFICATIONS

NOTE • This specifications are subject to change without notice.

WARRANTY AND AFTER-SERVICE

If a problem occurs with the equipment, first refer to the **7** “WHAT TO DO WHEN YOU THINK A MACHINE DEFECT HAS OCCURRED” section and run through the suggested checks. If this does not resolve the problem contact your dealer or service company. They will tell you what warranty condition is applied.

| 1600 × 1200 | 75.0 | 60.0 | VESA | UXGA (60Hz) | Zoom out | Zoom out |

- NOTE** • Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
- Be sure to check jack type, signal level, timing and resolution before connecting this projector to a computer.
 - Depending on the input signal, full-size display may not be possible in some cases. Refer to the number of display pixels above.
 - This projector will display up to UXGA (1600X1200) resolution signals but the image will be rescaled to the native resolution of the projector. Best display performance is achieved when the signal input resolution is the same as the native resolution of the projector.
 - The image may not be displayed correctly when the input sync. signal is "Composite Sync." or "Sync. on G".

INITIAL SET SIGNALS

The following signals are used for the initial settings.

The signal timing of some computer models may be different. In such case, refer to adjust the V.POSIT and H.POSIT of the menu.

| Computer / Signal | Horizontal signal timing (μs) | | | |
|-------------------|-------------------------------|-----|------|-----|
| | a | b | c | d |

CONNECTION TO THE MOUSE CONTROL

ADB Mouse

Serial Mouse

USB Mouse

PS/2 Mouse

RS-232C COMMUNICATION

- (1) Turn off the projector and computer power supplies and connect with the RS-232C cable.
- (2) Turn on the computer power supply and after the computer has started up, turn on the projector power supply.

Communications setting

19200bps, 8N1

1 Protocol

Consist of header (7 bytes) + command data (6 bytes).

2 Header

BE + EF + 03 + 06 + 00 + CRC_low + CRC_high

CRC_low : Lower byte of CRC flag for command data.

CRC_high : Upper byte of CRC flag for command data.

3 Command data

Command data chart

| byte_0 | byte_1 | byte_2 | byte_3 | byte_4 | byte_5 |
|--------|--------|--------|--------|--------------|--------|
| Action | | Type | | Setting code | |
| low | high | low | high | low | high |

Action (byte_0 - 1)

| Action | Classification | Content |
|--------|----------------|--------------------------------------|
| 1 | SET | Change setting to desired value. |
| 2 | GET | Read projector internal setup value. |
| 4 | INCREMENT | Increment setup value by 1. |
| 5 | DECREMENT | Decrement setup value by 1. |
| 6 | EXECUTE | Run a command. |

TECHNICAL

RS-232C COMMUNICATION (continued)

Requesting projector status (Get command)

- (1) Send the request code Header + Command data ('02H'+ '00H'+ type (2 bytes) + '00H'+ '00H') from the computer to the projector.
- (2) The projector returns the response code '1DH'+ data (2 bytes) to the computer.

Changing the projector settings (Set command)

- (1) Send the setting code Header + Command data ('01H'+ '00H'+ type (2 bytes) + setting code (2 bytes)) from the computer to the projector.
- (2) The projector changes the setting based on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

Using the projector default settings (Reset Command)

- (1) The computer sends the default setting code Header + Command data ('06H'+ '00H'+ type (2 bytes) + '00H'+ '00H') to the projector.
- (2) The projector changes the specified setting to the default value.
- (3) The projector returns the response code '06H' to the computer.

Increasing the projector setting value (Increment command)

- (1) The computer sends the increment code Header + Command data ('04H'+ '00H'+ type (2 bytes) + '00H'+ '00H') to the projector.
- (2) The projector increases the setting value on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

Decreasing the projector setting value (Decrement command)

- (1) The computer sends the decrement code Header + Command data ('05H'+ '00H'+ type (2 bytes) + '00H'+ '00H') to the projector.
- (2) The projector decreases the setting value on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

When a command sent by the projector cannot be understood by the computer

When the command sent by the projector cannot be understood, the error command '15H' is returned by the computer. Some times, the projector ignores RS-232C commands during other works. If the error command '15H' is returned, please send the same command again.

When data sent by the projector cannot be practice

When the command sent by the projector cannot be practiced, the the error code '1cH'+ 'xxxxH' is returned.

When the data length is greater than indicated by the data length code, the projector will ignore the excess data code.

Conversely, when the data length is shorter than indicated by the data length code, an error code will be returned to the projector.

- NOTE**
- Operation cannot be guaranteed when the projector receives an undefined command or data.
 - Provide an interval of at least 40ms between the response code and any other code.
 - The projector outputs test data when the power supply is switched ON, and when the lamp is lit. Ignore this data.
 - Commands are not accepted during warm-up.
