

Selecting and entering device codes

Note:

- Two or more equipment codes cannot be entered for the same item of equipment.
- Equipment codes cannot be entered for "PJ".
- For device codes that have a power remote control signal, the power remote control signal for the device will be transmitted when the device code is selected. Turn the power for the device on as a test.

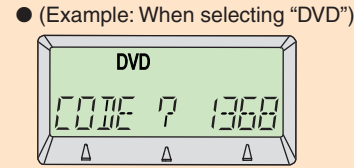

Setting method

1 Press [SETUP] for 3 seconds or more.

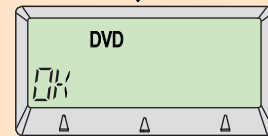

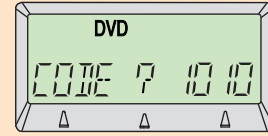

SETUP

2 Select the equipment that you would like to set, and then press [Enter].

3 Select the desired equipment code while referring to "Equipment code list", and then press [ENTER].

Note:

- If the home theatre system cannot be operated with the code you have entered, enter the next equipment code that is listed.
- If the home theatre system does not support this function, it will not operate when the buttons are pressed.
- Refer to the Remote Control Operating Guide for the remote control for details on other setting methods.

Names and functions of each part

* Buttons shown in this colour are buttons that can be used for learnt functions.

Projector power button
This turns the projector power on and off.

Liquid crystal display
The top shows the selected device, the bottom shows the functions of that device that can be operated.

Function buttons (A/B/C)
These operate the displayed functions for the selected equipment.

MUTE button
This mutes the sound.

Channel button
This selects the channel.

Projector button
This switches the remote control functions to projector mode.

MENU button
This switches to menu mode for the selected equipment.

▲▼▶◀ button
This moves the selection up or down or to the left or right.

NORMAL button
This returns setting values to their factory defaults.

PIC.MODE button
This switches to the image menu.

ASPECT button
This switches the aspect ratio.

MAIN adjustment button
This displays the "PICTURE" menu.

ADVANCED adjustment button
This displays the "ADVANCED" menu.

System power button
This turns the power supply for equipment other than the projector on and off.

LIGHT button
This turns on the backlight for the remote control.

SETUP button
This switches to setup mode for the selected system equipment.

SOURCE button
This selects the equipment to be operated.

VOLUME button
This adjusts the sound volume.

DVD/video playback buttons
These buttons are used for functions related to DVD and video playback.

RETURN button
When a menu is displayed, this button returns to the previous menu.

ENTER button
This button accepts the selected item.

SHUTTER button
This button lets you momentarily hide images.

Input select buttons
These buttons select the input signals from connected equipment.

MEM.LOAD button
This displays the "MEMORY LOAD" menu.

C.C.M. (Cinema Colour Management) button
This displays the "COLOUR MANAGEMENT" menu.

Learning home theatre system remote control signals

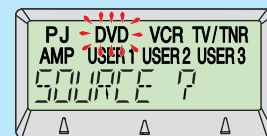

Note:

- Remote control signals that are not infrared-type (wave format) signals cannot be recorded.
- It may not be possible to record some types of signal.

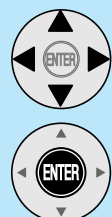

Setting method

1 Press [SETUP] for 3 seconds or more.

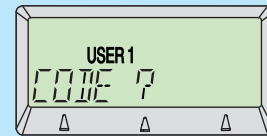

SETUP

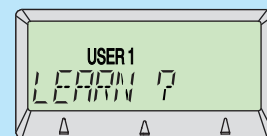

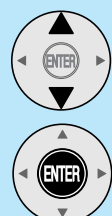

2 Select "USER 1-3" and then press [ENTER].

(Example: When selecting "USER1")

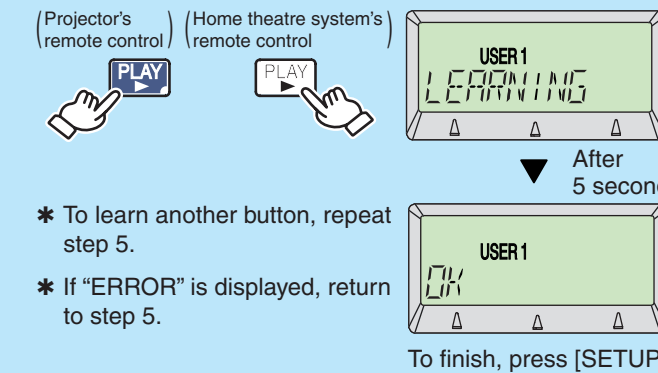

3 Select "LEARN?" and then press [ENTER].

4 Place the projector's remote control next to the emitter of the home theatre system's remote control.

5 Press the button on the projector's remote control that you would like to learn, and after "LEARNING?" is displayed, press the corresponding button on the home theatre system device's remote control.

* To learn another button, repeat step 5.

* If "ERROR" is displayed, return to step 5.

To finish, press [SETUP].

SETUP

Note:

- If the batteries of the remote control are spent, the signals will not be recorded correctly.
- Each button must be recorded separately.

PT-AE900U/E LCD Projector Remote Control Quick Reference Guide

In addition to operating the projector, this remote control can also be used to make simple settings for your home theatre system.

Note:

- This remote control is only to be used for operating home theatre system. Do not use it for any other type of equipment.
- It may not be possible to record all home theatre system operations.
- Refer to the Remote Control Operating Guide for details on operation.

- Be sure to read the Operating Instructions for the projector and the home theatre system also when using the remote control.
